CAREER OBJECTIVE

Motivated and detail-oriented Java Full Stack Developer with strong knowledge in Java, Spring Boot, JDBC, SQL, HTML, CSS, JavaScript, and React.js. Seeking an entry-level software development position to build scalable web applications and contribute to organizational growth through continuous learning and problem-solving.

PROJECTS

Real-Time Motion Detection with Alarm System | HTML, CSS, JavaScript

Nov 2024-Jan 2025

- Developed a real-time motion detection system capable of monitoring live webcam feeds and detecting movement using frame comparison techniques.
- Implemented automated alarm notifications, custom alert messages, and snapshot capture functionality for enhanced security monitoring.
- Improved motion detection accuracy using grayscale frame processing and pixel-based motion analysis for reliable movement detection.

Bank Loan Application System | Java, Spring Boot, Hibernate, MySQL, REST API

Feb 2026-March 2026

- Developed a secure web-based bank loan application system enabling users to apply for and track loan requests online.
- Built RESTful APIs using Spring Boot for customer registration, loan application processing, and approval workflows.
- Designed and implemented a normalized MySQL database schema for customers, loan records, EMI details, and repayment tracking using Hibernate/JPA.
- Integrated backend validation, exception handling, and optimized SQL queries to improve application reliability and performance.

TRAINING

Java Full Stack Developer Training | QSpiders

July 2025 – May 2026

- Undergoing intensive training in Core Java, JDBC, Servlets, Spring Boot, Hibernate, and MySQL.
- Learning front-end technologies including HTML, CSS, JavaScript, and React.js for full-stack web development.
- Developing RESTful APIs and real-world projects using Spring Boot and database integration techniques.
- Practicing Data Structures, SQL queries, and problem-solving skills for technical interviews and software development.

CERTIFICATION & INTERNSHIP

Green Skills and Artificial Intelligence Certification | Edunet Foundation, AICTE & Shell

Jan 2025 – Feb 2025

- Completed an advanced course on Green Skills and Artificial Intelligence under the Skills4Future Program.
- Learned fundamentals of Artificial Intelligence, sustainability concepts, and emerging technology applications.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frameworks & Technologies: Spring Framework, Spring Boot, Hibernate, JDBC, Servlets, React.js

Web Technologies: HTML, CSS, JavaScript

Database Technologies: MySQL, Oracle SQL
